

Summary

Full Stack Developer with 1.5+ years of experience working with React.js. Built web applications such as ERP systems, online exam platforms, and question bank systems with AI-based explanation features. Familiar with REST APIs, building reusable components, with a focus on clean and efficient code.

Experience

React Developer

[BeingMash Services Pvt Ltd, Kalaburagi](#)

Aug 2024 – Present

- Optimized application performance, achieving **25% faster processing**, and **30% improvement in user satisfaction** through code optimization and **efficient state management**.
- Developed scalable applications (**School ERP, Secure online exam platforms with anti-cheating, on-demand services**), **handling 1000+ concurrent users** and delivering improved user experience.
- Designed backend systems and **RESTful APIs**, implementing **JWT authentication and caching strategies**, and integrating **payment gateways, logistics APIs, and geolocation services**—resulting in **35% improved system reliability**.
- Developed **responsive front-end applications using React.js**, leveraging **code splitting, lazy loading, and optimized rendering**, improving **30% user engagement** and **25% faster response times**, while building **AI-powered features** to reduce **manual effort by ~50%**.

Personal Projects

Portfolio Website

[Live](#) | [Source Code](#)

Developed a responsive portfolio using React.js, featuring great UI/UX, fast performance, cross-device compatibility, and integrated CV download and contact form functionality.

DooBamboo Ecommerce Website

[Live](#) | [Source Code](#)

Developed a fully responsive eCommerce website with a modern, user-friendly UI, enhancing overall user experience and engagement. Implemented key features like product listing, dynamic filtering, cart management, and API integration for seamless functionality.

Skills

- Front-End:** React.js (Hooks, Context API), JavaScript, HTML5, CSS3, Material UI, Bootstrap.
- APIs:** RESTful APIs, JWT Authentication, API Integration.
- Tools & DevOps:** Git, GitHub, Postman, VS Code, NPM, Render.
- Core Concepts:** Performance Optimization, Lazy Loading, Code Splitting, Responsive design, Scalable Architecture.

Education

B.Tech (ECE) (CGPA: 7.8)
